

**CY4GATE MENTIONED AS A REPRESENTATIVE PROVIDER
IN 2022 GARTNER® INNOVATION INSIGHT FOR COMPOSITE AI REPORT**

Rome, January 25, 2022 – Cy4Gate S.p.A. (EGM: CY4) – operating company in the cyber market at 360 degrees, has been included as a “Representative Provider for Composite Artificial Intelligence solutions”, by 2022 Gartner report on Innovation Insight for Composite AI.*.

“Composite Artificial Intelligence” consists in the combination of several artificial intelligence techniques (such as, Natural Language Processing or NLP, Deep Neural Network, Speech Recognition, Computer Vision, just to mention a few) with the aim of making big data analysis more efficient and effective, without the need, however, of relevant computational capabilities.

We believe this recognition is the result of a multi-year path of Research and Innovation supported by major Cy4Gate investments in the most advanced Artificial Intelligence applications.

Since its establishment, Cy4gate has considered as decisive the use of AI in innovative ways, to ensure its products the ability to perform at excellent levels even in highly complex, uncertain and ambiguous contexts. Within these application areas, the enormous amount of data generated by the consistent increase of interconnected devices can be profitably used to adopt appropriate and timely decisions, and to reduce margins of error.

As a consequence of these strategic choices, Composite AI is today applied to the entire product portfolio of the company, both in the Cyber Security and Cyber Intelligence sector, with a real competitive advantage over those who make exclusive use, to this day, of single AI techniques on the same product.

With a view to further strengthening and consolidating the initiatives on AI, and to maintaining a technological leadership role, on January 1st 2022, CyGate has established the "Data & Artificial Intelligence Center of Competence": a highly specialized division – part of the Engineering department – dedicated to the research, realization and implementation of Composite AI models for the benefit of all Product Business Units.

Emanuele Galtieri, CEO of Cy4Gate stated: *"We are deeply proud of Cy4gate's recognition in this Gartner report, which in our opinion confirms the value of the choices made by the company, at the time."*

Press release

With Composite AI, we provided our Cyber Security and Decision Intelligence products with a relevant and, by now, essential technology, which will be able to fulfill even the most rigorous performance requirements expected by our customers, and to keep a state-of-art company's product portfolio.

We are also aware that we can give our effective contribution in strengthening Italy's role in terms of artificial intelligence, for the benefit of PNRR initiatives and for the setting up of the National Strategic Pole on the cloud”.

*Gartner, “Innovation Insight for Composite AI”, Pieter den Hamer, Erick Brethenoux, Leinar Ramos, January 10, 2022.

About Cy4Gate

The Company was founded in 2014 to meet an unconventional demand for cybersecurity. Listed on Euronext Growth Milan since June 2020, CY4GATE was conceived to design, develop and produce technologies and products, systems and services that are able to meet the most stringent and modern requirements of "Cyber Intelligence & Cyber Security" expressed by the Armed Forces, the Police Forces, the Intelligence Agencies and the Companies, on the national and the foreign market. A Unique Italian industrial project, CY4GATE operates in the cyber market at 360°, with proprietary products that meet both the needs of information collection and analysis and security: QUIPO and AMICO, in the Cyber Intelligence segment; RTA, in the Cyber Security sector.
