

**CY4GATE WILL CONTRIBUTE TO A MAJOR RESEARCH AND DEVELOPMENT PROGRAM
FINANCED BY A TOP EUROPEAN CYBER DEFENCE AGENCY**

**CY4GATE, WHICH IS PARTICIPATING IN THE PROJECT WORTH OVER €300,000, WILL PROVIDE A
VITAL CONTRIBUTION TO IMPROVING THE COUNTRY'S CYBER SECURITY TECHNOLOGIES AND
KNOW-HOW**

Rome, 16 September 2021 - **CY4GATE** (AIM: - a company active in all areas of the cyber market - announces that it is taking part in a major European program financed by a leading European Cyber Defence Agency, which will equip the partners with an advanced, innovative capacity to combat looming and persistent cyber threats. This is one of the European Defence Fund (EDF) projects to render EU member states autonomous in the defence sector and promote military cooperation between members.

Worth over €300,000, the project will significantly expand CY4GATE's technologies and know-how in this specific segment. The project will enable the company to apply its proprietary technologies in the RTA (real time analytics) and QUIPO (decision intelligence) product family, making major improvements by harnessing sophisticated artificial intelligence, machine learning and cognitive computing techniques capable of preventing and countering new generation cyber attacks.

It is an important opportunity with significant benefits for the country's international competitiveness and the corporate market, in line with CY4GATE's strategy, according to which the development of vertical proprietary technologies with high quality, reliability and versatility standards distinguishes the company's value proposition at a time when cyber security is effectively needed to ensure the resilience of the country's economy and critical infrastructures.

Emanuele Galtieri, CEO of CY4GATE, remarked, "We are experiencing a strong surge in criminal activity related to cyber threats from isolated actors or associates. At the same time, the international community is much more aware that cyber risks are an issue to be addressed collectively. And the European Union, with these and similar initiatives, is sending a strong message to this effect. It is an honour for CY4GATE to help implement - with its proprietary Italian technologies and by sharing its expertise with other players - the ambitious roadmap for national and European growth in cyber security."

CY4GATE was founded in 2014 to meet demand for unconventional cybersecurity solutions. Listed on the AIM since June 2020, CY4GATE was created to design, develop and produce technologies, products and services that respond to even the most rigorous and sophisticated "Cyber Intelligence & Cyber Security" needs expressed by the Armed forces, Police, Intelligence Agencies and Companies in Italy and abroad. With its one-of-a-kind Italian business model, CY4GATE covers the entire cyber market with proprietary products for both data collection and analysis and security: QUIPO and Igea for cyber intelligence; RTA for Cyber Security.
